

SCHOOL OF MEDICAL SCIENCES HONOURS APPLICATION FORM

The School of Medical Sciences offers Honours courses in Anatomy, Neuroscience, Pathology, Physiology and Pharmacology. For entry into each course a Science student must complete at least 18 units at Level III in the relevant Major sequence outlined for each discipline (see the UNSW Online Handbook for prerequisites for Majors/Specialties in Anatomy, Neuroscience, Pharmacology and Physiology and a Minor in Pathology).

A credit average ($\geq 65\%$ weight average mark; WAM) for all pre-honours courses and completion of general studies requirements (12 units in total with no more than 3 units being undertaken in the Science faculty and a maximum of 6 units within any other faculty) is also required by both Science and Medical Science students prior to entry into the honours program. An applicant with a WAM of 60 to 64 will only be considered if the weighted average for all of their level 3 subjects is $\geq 65\%$. There are no other exceptions to this requirement.

The following form should be completed by the candidate and submitted to the Student Enquires Counter MG14 Wallace Wurth.

Honours applications for S 1 2010 are due by October 30th 2009.
